

Rockbestos-Surprenant manufactures a wide variety of military ground support singles and cables. These singles and cables are all flexible. The HTXE wire is typically used in ground vehicles. The remaining singles and cables incorporate Polychloroprene as the outer jacket, offering enhanced protection for use in field deployment. Polychloroprene jackets are often used to provide protection from Nuclear, Biological and Chemical (NBC) contamination.

Rockbestos-Surprenant also manufactures many cables not listed here that are either custom designed or manufactured to specific U.S. Army drawings.

Product Description	Specification	Link
<b>HTXE SINGLES, IRRAFLEX™ FLEXIBLE 600V, -55°C to +125°C</b> These singles are rated for applications where good high and low temperature properties are required. They are very flexible and will meet the VW-1 flame test. HTXE singles are rated for use at 125°C, 600V and are used in applications that require excellent oil and fluid resistance.	U.S. ARMY 122933251	26
<b>THERMOSET, 3CGM SINGLES, FLEXIBLE, WEATHER RESISTANT 600V, -55°C to +125°C</b> These singles are rated for applications where good high and low temperature properties are required. They are very flexible and will meet the VW-1 flame test. The 3CGM singles are rated for use at 125°C, 600V and are used in applications that require excellent fluid and sunlight resistance.	RSCC 3CGM	27
<b>MIL-C-13777, FLEXIBLE, PORTABLE, MULTI-CONDUCTOR CABLES 600V, -55°C to +75°C</b> These cables are available in numerous configurations. The components are constructed with Polyethylene/Polyamide and have an overall Polychloroprene jacket. They are used in applications which require flexing and interconnection of outside equipment.	MIL-C-13777	28
<b>720423 FLEXIBLE, PORTABLE INTERCONNECTION CABLE -55°C to +75°C</b> This cable is a composite construction utilizing various components. It has an overall Polychloroprene jacket, is very flexible and weather resistant.	720423	29
